Site is a pastoral area involving dark skinned people in a semi-arid setting very dependent on a variety of domestic animals. People wear flowing, colorful clothing. Structures present are old, multi-leveled, mud, stone, earthish in color, adjoining & abutting, with both open & covered areas. Though they are old they still are in use. An emprise seems to have been historically important to the area. The soil is very rocky & hilly, possibly of predominantly reddish colors.
